Aras Innovator Community Projects

Method of operation

The screenshot shows the Aras Innovator software interface. The left sidebar contains a tree view with categories like Administration, My Innovator, Change Management, Cloud Services, Dashboards, Data Administration, Design, DFMEAs, Part Families, Part Search By Classification, Parts, Products, Document Center, Documents, Handbooks, Library, Portfolio, Process, Project Management, Quality, Sourcing, Templates, and Search Modes. The 'Parts' category is selected. The main window displays a table of parts with columns: Part Number, Revision, Gen, BOM, Docs, CAD, and Name. The table lists various part numbers and revisions. A context menu is open over the table, showing options like New, Save As, Edit, View, Print, Purge, Delete, Export To Excel, Export To Word, Lock, Revisions, Promote, Where Used, Structure Browser, Properties, Add to Desktop, Add Part Characteristics, Manual Release, Create New Revision, Add Item(s) To Change..., Send Link by E-mail..., Multilevel BOM Report, BOM Quantity Rollup Report, and BOM Costing Report. The 'Properties' option is highlighted. A red arrow points from the 'Properties' option in the context menu to the 'Part "104361-P" properties' dialog box on the right.

The screenshot shows the 'Part "104361-P" properties' dialog box. It displays the same part information as the main window, including the 'Part' section with details like Created By, Created On, Modified By, Modified On, Locked By, Major Rev, Release Date, Effective Date, Generation, State, and a 'Released' status. Below this, there are two input fields: 'id' with the value '8D888D5F' and 'url' with the value 'http://101'. Both fields have a 'Copy' button next to them. A red dashed box highlights the 'url' field and its 'Copy' button.
